INTRODUCTION

In 1985, crop producers in the U.S. experienced one of the most favorable spring planting seasons of the past three years. Plantings were far ahead of normal in all major crop categories and indicated higher yield potentials. The major crop-growing areas in 1985 had sufficient rainfall and favorable temperatures during the critical development stages. In November, corn for grain was forecast at a record high 8.72 billion bushels, up 14 percent from 1984, and 6 percent more than the previous record set in 1982. Soybean production was forecast at 2.13 billion bushels, 14 percent above the 1984 forecast.

The oversupply of U.S. agricultural products, lagging export demand, the firm U.S. dollar, and uncertainties involving the Farm Bill were all negative factors affecting the Chicago Board of Trade agricultural commodities in 1985. Trading volume in soycomplex, corn, wheat, and oats futures all posted declines compared to 1984. The CBOT maintained an 89.5 percent market share in 1985 grain and feed futures markets, which was .2 percent above the 1984 total. Chicago Board of Trade oats futures posted the sharpest loss in volume for 1985, declining by 36.2 percent compared to 1984. The CBOT wheat volume in 1985 totaled 2,127,962 contracts, a decline from 1984 of 28.5 percent. CBOT corn volume totaled 6,392,812 contracts, (down 29.8 percent from 1984), whereas CBOT soybean volume in 1985 totaled 7,392,128 contracts (a drop of 34.9 percent from 1984).

The Chicago Board of Trade volume as a whole increased by 12.7 percent and accounted for 47.0 percent of the total market share volume in futures across the U.S. The increase in CBOT volume was reflected mainly by the interest rate futures and options on futures. Soybean options in 1985 totaled 840,786 contracts, an increase from 1984 of 73,006. Soybean options began trading on October 31, 1984. CBOT corn options began trading on February 27, 1985, and, by the end of 1985, had a year-end volume total of 363,549 contracts.

EXPORT BONUS PROGRAM

A major topic in the first half of 1985 involved the Export Bonus Program. In late May, USDA Secretary John Block announced the export bonus commodities that would be targeted to combat export subsidies from other countries, especially the European Economic Community. The program would offer up to $2 billion in export incentives for U.S. farm products over the next three years.

The first country targeted for the Export Bonus Program was Algeria. The U.S. share of wheat in Algeria had dropped to 16 percent in 1985 from 41 percent in 1979. During the same time, EEC wheat exports to Algeria grew to 59 percent from 29 percent. Block said Algeria was selected as an example of the countries the U.S. plans to target with its new export subsidy—nations in which American farmers had lost sales to foreign competitors who undercut prices due to heavy subsidies from their governments.

The Export Bonus Program also encouraged U.S. trading partners to begin serious negotiations of agricultural trade problems. At the end of 1985, ten countries were cited as potential candidates for the program.

Following the inception of the program in August, the March wheat contract rose 58 cents, partly in response to the export bonus wheat sales totaling approximately 2.2 million tonnes, or about 16 percent of the 13.4 million tonnes of U.S. wheat booked and exported since August 1, 1985.

Total U.S. wheat exports in 1984/85 declined below the previous season's totals, largely due to uncompetitive U.S. wheat prices. Key competitors for the wheat export business included the European Economic Community, followed by Australia and Argentina.

1985 FARM BILL

The government's 1985 Farm Bill contributed to traders' worries, as well. Two major problems affecting the U.S. farm economy are the continuous decline of export business, primarily in grains and oilseeds, and the declining level of farm income.

The agricultural markets underwent record exports in the 1970s as a result of new markets, worldwide production shortfalls, and a weakening U.S. dollar. However, in the 1980s the agricultural markets experienced sharp export declines. The U.S. dollar was at new record highs, discouraging foreign export demand. Meanwhile, competing nations increased their level of production and market share for agricultural exports.

In order for the U.S. to regain export business, crop prices had to be reduced by adjusting downward the price-support loan rates. Prior to the December holidays, U.S. House and Senate negotiators approved a five-year omnibus Farm Bill that moved the U.S. slowly toward dependence on the markets for crop prices while maintaining income supports.

The Bill contained new soil conservation measures, a tougher approach to combating unfair trade practices by foreign competitors, and a shift to credit guarantees instead of direct loans for export programs and Farmers Home Administration borrowers.

Beginning in 1987 for wheat and feed grains, and 1988 for soybeans, the loan rate is set at 75 percent of a five-year market price average, excluding the high and low years, with no more than a 5 percent cut allowed annually in the formula loan rate.

The USDA secretary is given the authority to implement a market payback loan for wheat, feed grains, and soybeans. The USDA is also required to offer advance income loan payments, called deficiency payments, to wheat and feed grain farmers in 1986.

Target prices—the guaranteed levels on which deficiency payments are calculated—would be kept at 4.38 per bushel for wheat and 3.03 per bushel for corn in 1986 and 1987. Grain target prices would be reduced 2 percent in 1988, an additional 3 percent in 1989, and 5 percent in 1990. Targets cannot fall below 4.00 a bushel for wheat and 2.75 for corn. The USDA secretary could make up to 5 percent of the deficiency payments in commodities. There is no target price for soybeans.

Under the compromise approved, the USDA could require wheat farmers to reduce acreage as much as 25 percent in 1986 to qualify for government payments. The agreement specifies that farmers be compensated in commodities for 2.5 percent of the acreage cut next year. The USDA is also required to offer wheat farmers who have planted the 1986 crop a 10 percent paid diversion at 2.00 per bushel, bringing the maximum possible U.S. wheat acreage reduction in 1986 to 35 percent. In May 1985, winter wheat production was forecast at 1.97 billion bushels.

Beyond 1986, the Bill includes acreage reductions for wheat if carry-out is one billion bushels or more. Then, the USDA must ask for at least a 20 percent plantings cut, but no more than 27.5 percent in 1987, and 30 percent thereafter. If corn stocks reach two billion bushels in 1987 and beyond, the USDA must ask feed grain producers to reduce acreage at least 12.5 percent but no more than 20 percent.

The Farm Bill retained the U.S. farmer-owned reserve, but placed the reserve at 30 percent of domestic and export wheat usage, and 15 percent for corn. The Bill provides for a long-term conservation reserve that requires the USDA to accept bids from farmers to take 40 to 45 million acres of fragile land out of production for up to ten years.

On December 23, 1985, President Reagan signed the new five-year Farm Bill. The $52 billion Farm Bill was about $2 billion over Reagan's desired limit.

On January 13, 1986, the USDA announced the lowest allowable crop program loan rates for corn at 1.92 per bushel, and wheat at 2.40 per bushel. The USDA wanted prices for those crops to reach market-clearing levels as soon as possible. However, according to the 1985 Farm Bill, the 1986 soybean loan rate cannot be announced until August 1, 1986, 30 days before the beginning of the market year. The lowest price level allowed by the Bill for soybeans is 4.77 per bushel.

Section 1
Futures Prices
Volume of Sales

Price is a composite reflection of the changing ratio of supply and demand. Historical price data, supplemented by data on the availability and consumption of a commodity, allow commercial and speculative users of futures markets and other students of commodities trading to gain deeper insight into the dynamic nature of futures trading.

On the following pages you will find a complete listing of the high, low, and closing futures prices of CBOT commodities for each trading session during 1985. Additional tables of weekly, monthly, and annual ranges of price—from high to low—provide a quick glimpse of price volatility.

Data on futures trading volume and open contracts (the number of futures contracts not yet closed out by delivery or an opposite transaction) are measures of the strength and liquidity of our markets. These measurements are often analyzed in conjunction with price movements to predict future price trends.

Highlights

Wheat futures
Chicago Board of Trade

Basic Trading Unit	5,000 bushels
Deliverable Grade	No. 2 Soft Red, No. 2 Hard Red Winter, No. 2 Dark Northern Spring, No. 1 Northern Spring, and substitutions at differentials established by the Exchange
Delivery Points and Differentials	Chicago at par and Toledo at a 2 cent per bushel discount
Delivery Instrument	Registered warehouse receipts issued by warehouses approved by the Exchange
Price Quotation	Cents and quarter cents per bushel
Minimum Fluctuation	¼ cent per bushel ($12.50 per contract)
Daily Price Limit	20 cents per bushel ($1,000 per contract) above and below the previous day's settlement price
***Initial Margin**	$750 per contract
***Hedging Margin (Maintenance)**	$500 per contract ($500)
Hours of Trading (Chicago Time)	9:30 a.m. to 1:15 p.m.
Ticker Symbol	W

*As of December 31, 1985.
Margins required by member firms may exceed contract margins.

Highlights

Corn futures
Chicago Board of Trade

Basic Trading Unit	5,000 bushels
Deliverable Grade	No. 2 Yellow and substitutions at differentials established by the Exchange
Delivery Points and Differentials	Chicago at par and Toledo and St. Louis at a 4 cent per bushel discount
Delivery Instrument	Registered warehouse receipts issued by warehouses approved by the Exchange
Price Quotation	Cents and quarter cents per bushel
Minimum Fluctuation	¼ cent per bushel ($12.50 per contract)
Daily Price Limit	10 cents per bushel ($500 per contract) above and below the previous day's settlement price
***Initial Margin**	$500 per contract
***Hedging Margin (Maintenance)**	$300 per contract ($300)
Hours of Trading (Chicago Time)	9:30 a.m. to 1:15 p.m.
Ticker Symbol	C

*As of December 31, 1985.
Margins required by member firms may exceed contract margins.

Highlights

Options on Corn futures
Chicago Board of Trade

Basic Trading Unit	One CBOT corn futures contract of 5,000 bushels
Description	At any time prior to expiration, the buyer of one corn futures option may exercise his option to assume a position in one corn futures contract (long if the option is a call and short if the option is a put) of a specified contract month at a strike price set when the option was bought. Upon exercise, the seller of one corn futures option assumes an opposite position in one corn futures contract (short if the option is a call and long if the option is a put) at a strike price set when the option was sold.
Strike Price	Strike prices are listed in integral multiples of 10 cents per bushel
Contract Months	March, May, July, and December
Premium Payment	The premium must be paid in full by each clearing member to the clearing corporation and by each option customer to this commission merchant when the option is bought, or within a reasonable time thereafter
Price Quotation	Increments of 1/8 of a cent per bushel or $67.25 per contract
Daily Trading Limits	Ten cents per bushel above or below the previous day's settlement premium
Exercise	The option buyer may exercise his option on any trading day prior to expiration to assume a position at the strike price in the corn futures market. The clearing corporation assigns overnight an opposite futures position at the strike price to the option seller
Last Trading Day	Corn futures options cease trading in the month prior to the futures contract delivery month. Options stop trading at 1 p.m. on the last Friday that precedes, by at least ten business days, the first notice day for the corresponding corn futures contract
Expiration	Unexercised corn futures options shall expire at 10:00 a.m. on the first Saturday following the last day of trading

Highlights

Options on Soybean futures
Chicago Board of Trade

Basic Trading Unit	One CBOT soybean futures contract of 5,000 bushels
Description	At any time prior to expiration, the buyer of one soybean futures call (put) option may exercise his call (put) option to assume a long (short) position in one soybean futures contract of a specified month at a strike price set when the call (put) option was bought. Upon exercise, the seller of one soybean futures call (put) option assumes an opposite position of one short (long) soybean futures contract.
Strike Price	Strike prices will be listed in integral multiples of 25 cents (e.g., \$7.25, \$7.50, etc.)
Contract Months	January, March, May. July, August, September, and November
Premium Payment	The premium must be paid in full by each clearing member to the clearing corporation and by each option customer to his commission merchant when the option is bought, or within a reasonable time thereafter
Price Quotation	Increments of one eight (1/8) of a cent per bushel or \$6.25 per contract
Daily Trading Limits	Thirty (30) cents per bushel above or below the previous day's settlement premium
Exercise	The option buyer may exercise his option on any trading day prior to expiration to assume a position at the strike price in the soybean futures market. The clearing corporation assigns overnight an opposite futures position at the strike price to the option seller.
Last Trading Day	Soybean futures options cease trading in the month prior to the futures contract delivery month. Options stop trading at 1 p.m. on the last Friday that precedes, by at least ten business days, the first notice day for the corresponding soybean futures contract.
Expiration	Unexercised soybean futures options shall expire at 10:00 a.m. on the first Saturday following the last day of trading

Highlights

Soybean Meal futures
Chicago Board of Trade

Basic Trading Unit	100 tons
Deliverable Grade	One grade of meal only, with minimum protein of 44%—see Exchange Regulations for exact specifications
Delivery Points and Differentials	Shipping plants in six territories with par at Decatur, IL, and other locations at differentials determined according to Exchange Regulations
Delivery Instrument	Shipping certification from shipping plants approved by the Exchange
Price Quotation	Dollars and cents per ton
Minimum Fluctuation	10 cents per ton ($10.00 per contract)
Daily Price Limit	$10 per ton ($1,000 per contract) above and below the previous day's settlement price
***Initial Margin**	$700 per contract
***Hedging Margin (Maintenance)**	$400 per contract ($400)
Hours of Trading (Chicago Time)	9:30 a.m. to 1:15 p.m.
Ticker Symbol	SM

*As of December 31, 1985.
Margins required by member firms
may exceed contract margins.

Section 2
Cash Prices

Futures prices represent the market's best assessment of the probable cash value of a commodity at a future date. Futures prices tend to follow the movement of cash prices and, as a result, traders in commodity futures watch cash prices closely. Cash commodity prices are influenced by the prices of substitutes and the demand for products using the commodities as inputs.

This section contains daily, weekly, and monthly cash prices for CBOT commodities in Chicago and other principal market centers. Also presented are weekly and monthly cash prices for meals and oils competing with the soybean complex, and selected livestock feed/price ratios that indicate the derived demand for grains used in feed.

CHICAGO BOARD OF TRADE
Highest and Lowest Recorded Prices for Cash Grain
(per bushel)

	Highest	Date Occurred	Lowest	Date Occurred
Wheat	$ 6.91-1/2	Feb. 15, 1974	$ .44-1/2	Dec. 27, 1932
Corn	3.96-1/2	Sept. 30, 1974	.19-1/2	Sept. 8, 1896
Oats	2.93	June 25, 1975	.12-7/8	June 22, 1861
Soybeans	12.27	June 5, 1973	.57	Sept. 5, 1935

Section 3
Shipments and Receipts

Physical location of commodities in relation to the place where they are in demand is a critical factor in the making of both cash and futures prices. This section contains reports from the U.S. Department of Agriculture, terminal elevators, and transportation agencies that show the physical location and movement of visible stocks in both CBOT and related commodities for Chicago and other market centers.

Historical data on the movements of commodity stocks are arranged by mode of transport as well as location.

Section 4

Supply and Disposition
Miscellaneous Data

In this section the reader will find data on the production and consumption of commodities for a period of years. Reports include those from the U.S. Department of Agriculture detailing acreage, production, and yield of major crops by state. Other reports from the U.S. Census Bureau detail the monthly processing of the major oilseeds and stocks of refined products.

United States agriculture competes with hundreds of commodities from around the world. This section contains historical data on worldwide production and consumption of the major feed grains, which has an impact not only on pricing and profits in the agricultural sector, but also on the U.S. position in the international economy.

The production and consumption of nonagricultural commodities are fully detailed as well.

WHEAT SUPPLY AND DISPOSITION

UNITED STATES TARIFF DUTIES

The following tariff duties on cereals and farm products applies on imports into the United States (as of January 1, 1979)

U.S. TARIFF DUTIES	TARIFF DUTIES
Wheat Flour [1]	52 cents per 100 lbs.
Wheat	21 cents per bu. of 60 lbs.
Corn [2]	25 cents per bu. of 56 lbs.
Oats	4 cents per bu. of 32 lbs.
Rye Flour	22-1/2 cents per 100 lbs.
Rye	6 cents per bu. of 56 lbs.
Barley	7-1/2 cents per bu. of 48 lbs.
Flaxseed	50 cents per bu. of 56 lbs.
Soybeans, other	Regular 1 cent per lb. and 2 cents per 1 lb. certain countries
Soybean Oil	All Soybean Oil 22-1/2% as valorem
Buckwheat	Free, hull or not hulled
Bran, Shorts, etc.	Free
Barley Malt	30 cents per 100 lbs.
Rye Malt	22-1/2 cents per 100 lbs.
Hay	Free
Rice Fiber and Rice Straw	$5.00 per 2,000 lbs.
Other Straw	Free
Sheep	Free
Hogs	0.5 cent per lb. and 2 cents per lb. certain countries
Lard	3 cents per lb.

[1] Wheat Flour, by a proclamation of the President (TD 50404) under the authority of section 22 of the Agricultural Adjustment Act of 1933, as amended (7 USC 624), imports for consumption of wheat and wheat flour fit for human consumption, with certain exceptions stated in TDs 50609 and 50863, are limited to annual quotas of 800,000 bushels of wheat and 4,000,000 pounds of flour. The allocation of these quotas for foreign countries is set forth in TD 50404.

[2] Seed corn, certified by a responsible officer or agency of a foreign government in accordance with the rules and regulations of that government to have been grown and approved especially for use as seed, in containers marked with the foreign government's official certified seed corn tags ... 6¢ per bu. of 56 lbs.

The duty on cattle is as follows:

Cattle weighing less than 200 lbs. each are dutiable at 1-1/2 cents per lb. but the rate will be increased to 2-1/2 cents per lb. for importations beyond 200,000 head entered in the 12 month period beginning April 1 in any year.

Cattle weighing 200 lbs. or more but less than 700 lbs. each are dutiable at 2-1/2 cents per lb.

Other cattle imported specially for dairy purposes 1-1/2 cents per lb. but the rate will be increased to 2-1/2 cents per lb. on importations beyond 400,000 head entered in any 12 month period beginning April 1 in any year and to more than 120,000 head entered in any three month period beginning April 1, July 1, October 1, January 1 within any such 12 month period.
